About National Science Day

National Science Day is celebrated in India on 28 February each year to mark the discovery of the Raman effect by Nobel Prize winning Indian physicist, Sir Chandrasekhara Venkata Raman on the same day in the year 1928.

On behalf of SVKM's NMIMS University, Sunandan Divatia School of Science (SDSOS) is privileged to organize the celebrations of the 'National Science Day 2017'.

Partnered with Josh Foundation, we are organizing a Science Exhibition Competition for the 'Hearing Impaired' Students. The movement is focused on supporting hearing impaired children.

Children from specially abled schools from all over Mumbai will be participating in this one day event.

We at SDSOS, cordially invite you to participate in this event and seek your support for this cause by encouraging the students with special needs and contributing towards their education.

About NMIMS School of Science

Sunandan Divatia School of Science (SDSOS) was started in 2007 with a view to provide undergraduate and post graduate students an opportunity to be a part of the unique learning methodology of the university, which lays emphasis on academic excellence combined with industry oriented training. With the boom in information technology and more and more sophistication in instrumentation techniques, there is now a very thin dividing line between the various disciplines of science. Therefore, there is a greater need for flexibility in scientific thought as well as training manpower on an interdisciplinary plane. With this thought in view, the SVKM's NMIMS introduced, highly innovative and unique interdisciplinary courses at the School of Science from the academic year 2007-2008. The goal of the SDSOS is to be a Center of Excellence in the domain of Pure and Applied Science by providing quality education and research. Currently, we offer following programs in various disciplines of Science:

- Ph.D. program in Biological Sciences and Chemistry (Regular & Professional)
- Integrated M.Sc. - Ph.D. program in Biological Sciences and Chemistry
- M.Sc. in Statistics, Biological Sciences and Chemistry (Analytical & Organic)
- Masters of Physiotherapy
- B.Sc. in Applied Statistics and Analytics
- Integrated M.Sc. in Biomedical Science

About Josh Foundation

JOSH is a movement which was initiated by eminent ENT surgeon Dr. Jayant Gandhi and Ms. Devangi Dalal, a renowned audiologist. The movement is focused on supporting hearing impaired children. JOSH has been working towards this noble goal over the last 8 years. Supported by philanthropic donors, NGOs and many others.
